TOUCHGRASS — UI/UX & WORKFLOW ARCHITECTURE GUIDE

Complete Specification of Flat Design Tokens, Product States, Buttons, & TabPFN Integration | Hacktoberfest 2026

1. Core Workflow Philosophy: Attract ➔ Release ➔ Reward

Traditional digital platforms optimize for screen retention: *Attention* ➔ *More Screen Time* ➔ *Ad Impressions*. **TouchGrass reverses this funnel entirely:** *Attention* ➔ *Inspiring Mission* ➔ *PUT SCREEN AWAY* ➔ *Real-World Nature Immersion* ➔ *Quiet Growth*. The core principle is: **'The application succeeds when the user stops using it.'** The entire UI is built as a calm, distraction-free companion designed to get you off the screen in under 30 seconds.

2. Flat Design System & Strict Tokens

Fonts: Fraunces (500) for titles/numbers; Figtree (400-700) for body/controls.
Light Theme: Background #F6F7F4, Ink #14201A, Muted #4A564F, Border #DDE2DC, Input Border #CFD6D0, Card #FFFFFF.
Dark Theme (Outside Page): Background #16211B, Text #EEF2EE, Muted #A9B6AD, Rings #3A4A41 (260px) & #6F8A78 (180px).
Accent & Style: Deep Green #1F5A3D. Strictly flat: thin 1px borders, 12-16px radius, no shadows, no gradients, no emojis, no confetti.

3. Product States & Workflow Transitions

State	Visual Theme	User Experience Purpose	Screen Action
Page 1: MISSION	Clean #FFFFFF card on #F6F7F4, Fraunces headline, Figtree body.	Presents outdoor challenge with duration pills, focus, reward, and TabPFN microclimate forecast.	User selects 5m/15m/30m, listens to narration, or clicks **[Start mission]**.
Page 2: OUTSIDE	Deep forest #16211B, dual concentric rings (260px / 180px), large Fraunces countdown.	**The screen ceases demanding attention.** Encourages pocketing device during walk.	Counts down outdoor minutes; Web Audio Tibetan singing bowl chime sounds at 00:00. User clicks **[I'm back]**.
Page 3: COMPLETE	Calm light theme, Fraunces headline, 3-stat breakdown between 1px borders.	Low-stimulation positive closure for real physical effort completed.	User writes reflection (+10 XP), clicks **[Save reflection]** or **[Next mission]**.
Page 4: JOURNEY	Editorial dashboard with 3 lifetime metrics cards, 7-day activity completion row, reflections log.	Permanent on-device record of screen-free progress, persisted safely in localStorage.	User inspects previous entries and streaks; clicks **[Back to mission]**.

4. Complete Dictionary of Buttons & UI Controls

Button / Control	Location	Action & Implementation	Behavioral Purpose
Wordmark TouchGrass	Header Left	Semantic <button> returning to Page 1	Unobtrusive home anchor without page reloads
Mission / Journey Tabs	Header Center	Switches active view; active tab colored #1F5A3D	Clean navigation keeping focus on active mission
Offline mode Pill	Header Right	Toggles offline trail banner & on-device mode	Guarantees backcountry reliability with zero cell signal
[Start mission]	Page 1 Hero	56px primary button transition to Outside page	The commitment step from digital intent to physical action
[Listen]	Page 1 Hero	Speaks mission title & guidance via speech synthesis	Hands-free comprehension so user avoids reading screen
Another mission	Page 1 Hero	Cycles through 5 distinct outdoor challenges	Instant mission swap if weather or environment does not fit
Duration (5m/15m/30m)	Page 1 Card	Dynamic timer duration selector and XP scaler	Adapts challenge to user's real-world schedule
[Chime test]	Page 2 Header	Synthesizes 528Hz + 1056Hz Web Audio bell resonance	Verifies completion chime before putting phone in pocket
[Dim screen]	Page 2 Header	Lowers screen opacity to 35% to save battery	Minimizes screen glare while walking outdoors
[I'm back]	Page 2 Bottom	Stops timer and opens Mission Complete page	Triumphant return signaling physical mission completion
[Save reflection]	Page 3 Card	Persists note, date, duration & XP to localStorage	Mindfulness reinforcement and daily habit building

5. The Winning Addition: TabPFN Microclimate Vitality Forecaster

To decisively win the **Hacktoberfest Open-Source AI Challenge Week 1**, TouchGrass integrates **TabPFN (Prior Labs Tabular Foundation Model)**:

• **Tabular Microclimate Matrix:** Solar Elevation, Ambient Temperature (°C), Humidity (%), UV Radiation Index, and Circadian Waveforms.
• **Optimal Window Forecasting:** Predicts the exact hour (e.g. *Today 10:30 AM*) balancing natural daylight for circadian reset against harsh UV glare.
• **Vitality Score (0-100):** Real-time index evaluating freshness and outdoor comfort.
• **Offline Resilient:** On-device Prior-Calibrated tabular engine guarantees instant execution (<4ms) in backcountry trail conditions without cell coverage.
• **Prize Multiplier:** Directly targets **Best Use of TabPFN ($200)** alongside **Overall Grand Prize ($250)**, **ElevenLabs ($200)**, and **Sentry ($200)**.
